Report on the celebration of the International Day of Mathematics

March 13, 2025: The program commenced with a welcome address by the Principal, Dr. Uttam Kr. Baruah, who spoke about students' fear of mathematics and how to overcome it. He encouraged students to see mathematics as an essential life skill rather than a difficult subject. He also highlighted the role of mathematics in daily life, explaining its applications in various fields, from finance and technology to logical reasoning and problem-solving.

The event's highlight was an engaging lecture on “Mathematics, Arts, and Creativity” by Dr. Arun Mahanta, Head of the Department of Mathematics. His talk explored the deep connection between mathematics and artistic creativity, with a special emphasis on fractals-self-repeating mathematical patterns found in nature, digital art, and architecture. He demonstrated how fractals appear in snowflakes, coastlines, trees, and even famous artworks, inspiring students to appreciate the artistic side of mathematics.

The event saw enthusiastic participation from around 40 students and several faculty members from different departments. Faculty members of the Department of Mathematics, including Dr. Arun Mahanta (HoD), Mr. Binod Kr. Sah, Dr. Dhurba Jyoti Bora, Miss Chinmoyee Hazarika, and Mr. Joy Prakash Medhi, were present and actively engaged in the event.

The program was anchored by Mr. Joy Prakash Medhi, Assistant Professor, Department of Mathematics, who ensured the smooth flow of the event. He concluded the program by thanking all attendees and emphasizing the importance of celebrating the International Day of Mathematics to appreciate its role in shaping the world around us.
