Ms. Goriyashi Mahanta- Assistant Professor, Department of Economics, Kaliabor College. Ph. : 6000972434

Members- Dr. Pradip Mochahary, Coordinator, IQAC and all members of IQAC.

In an era marked by complex global challenges, the integration of gender justice with sustainable development has become increasingly urgent. Gender equality is more than a fundamental human right as it is a crucial pillar for achieving sustainable goals for the society. By ensuring equitable opportunities and eliminating discrimination, we can unlock the potentialities of all genders, driving economic growth, social well-being, and environmental resilience. This seminar will illuminate the critical relationship between gender justice and sustainability, emphasizing how inclusivity accelerates progress for current and future generations. Gender inequality remains a significant barrier to sustainable development, affecting various sectors from healthcare and education to environmental management and economic participation. Disparities in areas of resource access and decision-making capabilities not only perpetuate cycles of poverty but also hinder effective responses to climate change and natural resource management. Understanding these intersections is essential for students, policy-makers, and advocates a commitment to build a just and sustainable world. This seminar will explore how gender dynamics impact broader development goals and outline strategies to create a more equitable society. Women and other marginalized sections have always played a pivotal role in shaping sustainable practices. Whether through climate adaptation strategies, local agriculture, or community-based initiatives, their contributions are invaluable. However, their work often goes unrecognized and unsupported due to systematic discrimination. This seminar will highlight the contributions of these groups, demonstrate the benefits of their full participation, and inspire actions to address inequalities. By focusing on real-world examples and case studies, attendees will gain a deeper appreciation of gender-sensitive approaches to sustainability.

Global efforts, such as the United Nations Sustainable Development Goals, underscore the importance of gender equality in achieving sustainable outcomes. Yet despite of having international frameworks, progress remains inconsistent. This seminar will critically examine existing policies, discuss successes and shortcomings, and propose pathways for more inclusive and effective solutions. Participants will learn about the transformative potential of gender-responsive policies and explore collaborative methods for impactful advocacy and policy-making.

Overall, this seminar is a call to action for students and future leaders. It will encourage them to think critically about the world's most pressing issues through a gendered lens and empower them to be agents of change. By understanding the significance of gender justice in the context of sustainable development, attendees will be equipped to champion initiatives that will foster equality and sustainability, making a lasting difference in their communities and beyond.

Theme and Sub-Themes of the Seminar

Theme :

Gender Justice and Sustainable Development

Sub-Themes :

1. Women empowerment and Sustainable Development
2. Poverty and Gender inequality
3. Impact of sustainable goal on gender development
